

BUILDING A COMMUNITY HUB WITH STRAW BALES

Women's Workshop

OPEN EVENT

Wednesday, 18th January 2023,

at 11.00am -12.30pm

The Womens' Workshop, Amble is planning to build a small building out of straw bales.

Building with bales is environmentally sound, it is interesting to learn and fun!

If you would like to find out more about this natural building method, or how to get involved, come and join us, have a coffee/tea and ask any questions.

An example of a much larger straw build:

This building is made from straw, but nobody knew that for 80 years!

It's now the HQ of the French Straw Bale Association.
